

OBJECTIVE

Long-term capital appreciation.

OUR INVESTMENT STRATEGY

Normally the Fund will invest at least 75% of its net assets in equity securities of non-U.S. domiciled companies or depository receipts of non-U.S. domiciled companies. The Fund may invest in companies of any size; however, investments will generally be in companies with large capitalizations.

OUR INVESTMENT PROCESS

We use a bottom-up approach that seeks to identify companies with attractive fundamentals, such as long-term growth in revenue, earnings, and show a high probability for superior future growth. We look for companies that are industry leaders with:

- Sustainable competitive advantages
- Corporate culture emphasizing strong, quality and experienced management
- Low or no debt
- Attractive relative valuation

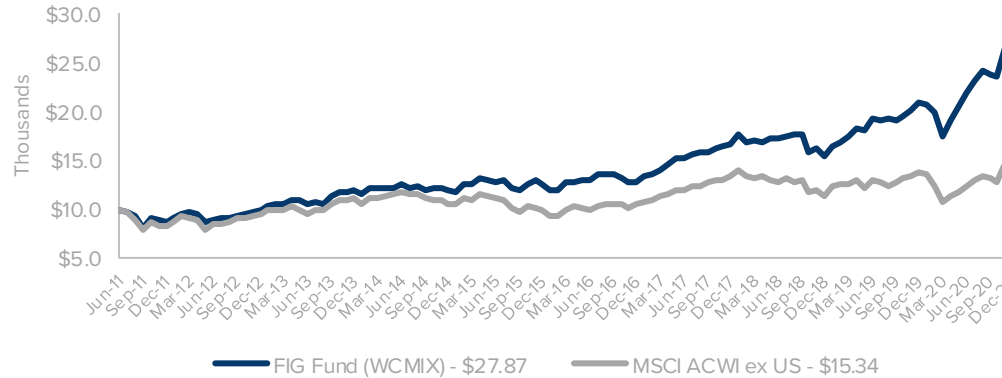

OUR PHILOSOPHY

WCM believes that attractive returns can only be achieved by structuring portfolios distinct from the market indices. As a result, the fund typically holds around 30–40 companies, concentrating on our best ideas. Our focus is on industry-leading, non-US organizations led by visionary management teams with sound business strategies. These companies often dominate their industry, and it is our belief that they will continue that domination well into the future. Thus, when selecting equity investments, our minimum time horizon is 3–5 years.

WCM FOCUSED INTERNATIONAL GROWTH FUND FACT SHEET AS OF DECEMBER 31, 2020

Performance

HYPOTHETICAL GROWTH OF \$10,000 USD (Since Inception)**

PERFORMANCE* (%)

*Performance data quoted represents past performance and is no guarantee of future results. Current performance may be lower or higher than the performance data quoted. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than original cost. For the most recent month-end performance, please call 1.888.988.9801. Periods greater than one year are annualized. Return figures include the reinvestment of all dividends and income.

Characteristics

PORTFOLIO CHARACTERISTICS	FIG Fund	ACWI ex US
P/E (trailing)	43.0	20.6
P/E (forward)	42.1	19.0
Return on Equity %	19.8	13.7
EPS Growth (LT) %	14.6	13.1
Wt. Avg. Market Cap (\$ bil)	133.1	100.3
Median Market Cap (\$ bil)	50.0	9.1
Active Share %	89.9	0.0

Trailing Price-to-earnings (Trailing P/E) ratios are calculated using 12-month trailing earnings.

Forward Price-to-earnings (Forward P/E) ratios are calculated using 12-month forward consensus earnings estimates.

Return on Equity = Net Income/Shareholder's Equity

EPS Growth (LT) = Estimated Long-Term (LT) Earnings Per Share Growth

Active share measures the extent of active management in a portfolio compared to the corresponding benchmark listed.

The MSCI ACWI ex US is a free float-adjusted market capitalization index designed to benchmark the performance of various global equity markets. The MSCI ACWI ex US is an unmanaged index of stocks, bonds or mutual funds. It is not possible to invest directly in an index.

Before investing, consider the fund's investment objectives, risk, charges, and expenses. Visit www.wcminvestfunds.com, im.natixis.com or call 1.888.988.9801 for a prospectus or a summary prospectus containing this and other information. Read it carefully.

Natixis Distributors L.P. (fund distributor) and WCM Investment Management are affiliated. Natixis Distribution, L.P. (Member FINRA/SIPC) is a limited purpose broker-dealer and the distributor of various registered investment companies for which advisory services are provided by affiliates of Natixis Investment Managers.

Foreign and emerging market securities may be subject to greater political, economic, environmental, credit, currency and information risks. Foreign securities may be subject to higher volatility than US securities, due to varying degrees of regulation and limited liquidity. These risks are magnified in emerging markets. Equity securities are volatile and can decline significantly in response to broad market and economic conditions. Currency exchange rates between the US dollar and foreign currencies may cause the value of the Fund's investments to decline. Growth stocks may be more sensitive to market conditions than other equities, as their prices strongly reflect future expectations. Concentrated investments in a particular region, sector, or industry may be more vulnerable to adverse changes in that industry or the market as a whole.
